Duong Dinh Khanh

Frontend / Fullstack Developer

Ha Noi City, Vietnam

PROFESSIONAL SUMMARY

Frontend / Fullstack Developer with **5+ years** delivering production-grade web and mobile applications in aviation, banking/fintech, healthcare, telecom, and logistics AI. Led Angular feature development for **Cebu Pacific Air** — one of SEA's top low-cost airlines — and shipped enterprise systems at **Techcombank**, **Viettel**, and **RATRACO**. Core expertise in **Angular**, **React**, **TypeScript**, **Node.js**, and **Python**, with hands-on AI automation experience using **YOLOv8**, **Ollama**, **RTSP camera streams**, and computer vision workflows.

CORE STRENGTHS

WORK EXPERIENCE

Frontend Developer

Jun 2025 — Jun 2026

SmartOSC — Cebu Pacific Air (Philippines) Aviation / Enterprise

- Engineered enterprise Angular features for Cebu Pacific's booking platform — one of SEA's largest low-cost airlines, serving **10M+ passengers annually** across the region.
- Spearheaded full CMS platform migration and integrated **3+ third-party APIs** (booking, payment, airline systems), cutting feature integration time by ~30%.
- Owned end-to-end code review pipeline; maintained **zero critical defects** across all production releases in a high-stakes international client engagement.

Third-party Integrations

Frontend Developer

Jan 2024 — Jan 2025

Techcombank Dev Banking / Fintech

- Built enterprise bidding and contract management modules handling thousands of daily internal banking transactions with strict accuracy requirements.
- Architected scalable Angular + NgRx state management layer, delivering **~40% improvement** in app performance and a measurable drop in critical bug rate.
- Led targeted refactoring initiative that raised SonarQube scores from **C → A** across 3 core modules, significantly improving long-term maintainability.

SonarQube

AI / Fullstack Developer

2024 — 2025

RATRACO Logistics / AI Automation

- Built AI-powered enterprise tools for logistics operations, including **container temperature monitoring** and business workflow automation.
- Implemented **license plate recognition from RTSP camera streams** using YOLOv8, Ollama-assisted processing, Angular frontend, and Node.js backend services.

Frontend Developer

Jan 2021 — Jan 2023

Aratech Healthcare / Telecom

- Built Hospital LIS system UI serving **500+ daily medical staff** — complex data workflows, role-based access, and real-time lab result management.
- Delivered Viettel contract management platform managing **10,000+ contracts**; reduced page load time ~35% via lazy loading and component-level optimization.

Freelance Fullstack Developer

2021 — Present

Independent Fullstack / AI

- Delivered **5+ end-to-end fullstack solutions** (Angular + Python) with LLM/AI integrations, enabling business process automation for SME clients.
- Built Meta Ads automation platform integrating Facebook + TikTok APIs for campaign analytics and lead generation; developed React Native Japanese learning app with spaced repetition.
- Sole owner of a **live production driving school platform** (Angular + Python, Vercel) — handling all DevOps, feature delivery, and real user support from day one.

FEATURED PROJECTS

Cebu Pacific Air Platform

Enterprise booking & CMS platform for one of SEA's largest low-cost airlines (10M+ passengers/yr). Angular-first with multiple third-party API integrations and zero-defect production delivery.

AngularCMSREST APITypeScript

RATRACO AI Operations Platform

Enterprise AI tools for logistics operations — container temperature monitoring, RTSP camera license plate recognition, and workflow automation using YOLOv8, Ollama, Angular, and Node.js.

AngularNode.jsYOLOv8OllamaRTSP

Viettel Contract Manager

Internal lifecycle platform for 10,000+ contracts at Vietnam's largest telecom. Microservices architecture with multi-level approval workflows; ~35% load time improvement.

AngularAngularJSMicroservices

AI / LLM Integration Projects

Multiple client projects embedding LLMs into web apps — intelligent chatbots, document processing pipelines, and workflow automation tools built with Python + Angular.

PythonLLMAngular

Techcombank Bidding System

Enterprise contract & bidding management for internal banking ops. NgRx architecture delivered ~40% performance uplift; SonarQube scores raised from C → A across 3 modules.

AngularNgRxTypeScriptSonarQube

Hospital LIS System

Lab information system for 500+ daily medical staff — complex data workflows, role-based access, and real-time lab result management across hospital departments.

AngularREST APISQL

Meta Ads Automation Platform

Business automation platform using Facebook and TikTok APIs — ad campaign management, analytics dashboards, and automated lead generation pipelines for SME clients.

AngularPythonMeta API

Driving School Management System LIVE IN PRODUCTION

Fullstack platform built solo from scratch — student lifecycle management, lesson scheduling, internal exam engine, real-time progress analytics, and RBAC (Admin / Student / Guest). Deployed on Vercel; actively serving real users with all DevOps and feature roadmap owned independently.

AngularPythonNode.jsREST APIVercelFullstack

PERSONAL PROJECT — FULLSTACK DEVELOPER

Driving School Management System

2025 — Present

Self-directed · Live · hoclaixe-hieukhanh.vercel.app Fullstack / Real Users

- Sole owner: designed and built a production fullstack platform solo — from requirements analysis to CI/CD deployment — with no team or external guidance.
- Implemented **RBAC** (Admin / Student / Guest), complete student lifecycle, lesson scheduling, internal exam engine, and real-time progress tracking.
- Handles all DevOps, feature roadmap, bug triage, and production incident response independently — **100% uptime** since public launch.
