Duong Dinh Khanh

Frontend / Fullstack Developer

Ha Noi City, Vietnam

PROFESSIONAL SUMMARY

Frontend / Fullstack Developer with **5+ years** delivering high-performance web and mobile applications across aviation, banking/fintech, healthcare, telecom, and AI domains. Deep expertise in **Angular, React, TypeScript, and Node.js** with a strong record of scalable frontend architecture, CMS migration, and enterprise API integration. Trusted collaborator across QA, BA, backend, and design teams — from requirement analysis to production release.

CORE STRENGTHS

- Enterprise Angular Architecture
- CMS Platform Migration
- API & Third-Party Integration
- Performance Optimization
- Code Review Ownership
- Cross-functional Collaboration
- Clean Code & Maintainability
- LLM / AI Integration
- Fullstack Product Delivery
- Agile / Scrum

WORK EXPERIENCE

Frontend Developer

Jun 2025 — Jun 2026

SmartOSC — Cebu Pacific Air Aviation / Enterprise

- Engineered enterprise Angular features for one of SEA's leading low-cost airline booking platforms.
- Spearheaded CMS platform migration and integrated third-party booking, payment, and airline APIs.
- Owned end-to-end code review pipeline and feature delivery in a high-stakes international client environment.

AngularCMS MigrationREST APITypeScriptThird-party Integrations

Frontend Developer

Jan 2024 — Jan 2025

Techcombank Dev Banking / Fintech

- Built enterprise bidding and contract management systems for internal banking operations.
- Implemented scalable Angular + NgRx architecture with measurable performance and stability gains.
- Led refactoring initiatives elevating code quality, Sonar scores, and long-term maintainability.

AngularNgRxTypeScriptREST APISonarQube

Frontend Developer

Jan 2021 — Jan 2023

Aratech Healthcare / Telecom

- Developed Angular / AngularJS applications for Hospital LIS and Viettel contract management platforms.
- Optimized UI, responsiveness, and component architecture; directly engaged clients to clarify requirements.

AngularAngularJSSQLMicroservices

Freelance Fullstack Developer

2021 — Present

Independent Fullstack / AI

- Delivered end-to-end fullstack solutions (Angular + Python) integrating LLM / AI for business automation.
- Built Meta Ads automation platform (Facebook + TikTok APIs) and a React Native Japanese learning app.

DEV WORKFLOW

- 01 Requirement Analysis
- 02 User Story Breakdown
- 03 API Contract Alignment
- 04 Reusable Component Build
- 05 API Integration & Optimize
- 06 Unit Testing
- 07 PR & Code Review
- 08 Sonar / Code Quality
- 09 Production Delivery

FEATURED PROJECTS

Cebu Pacific Air Platform

Enterprise booking & CMS system for one of SEA's largest low-cost airlines — third-party API integrations, scalable Angular architecture.

AngularCMSREST API

Hospital LIS System

Lab information system with complex data workflows, role-based access, and real-time lab result management for hospital operations.

AngularREST APISQL

Viettel Contract Manager

Internal contract lifecycle platform for Vietnam's largest telecom — microservices architecture with multi-level approval workflows.

AngularMicroservices

Japanese Learning App

Cross-platform mobile app — spaced repetition, kanji drills, vocabulary sets, and progress tracking for Japanese learners.

React NativePython

Meta Ads Automation Platform

Business automation platform using Facebook and TikTok APIs for campaign management, analytics, and lead generation.

AngularPythonMeta API

AI Integration Projects

Multiple client projects integrating LLMs into web apps — intelligent chatbots and document processing/workflow automation pipelines.

PythonLLMAngular

Driving School Management System **LIVE IN PRODUCTION**

Fullstack platform for driving school ops — student management, lesson tracking, internal exams, progress analytics, and RBAC for Admin / Student / Guest. Actively serving real users in production.

AngularPythonNode.jsREST APIVercelFullstack

PERSONAL PROJECT — FULLSTACK DEVELOPER

Driving School Management System

2025 — Present

Self-directed · Live on Vercel Fullstack / Real Users

- Designed and built a fullstack driving school platform from scratch — requirement analysis to production deployment on Vercel.
- Implemented RBAC (Admin / Student / Guest), student lifecycle management, lesson scheduling, internal exam engine, and progress tracking.
- Actively maintains and iterates on a live production system with real users, handling all DevOps and feature ownership solo.
